

CentralStar Blood Pregnancy Testing

- ✓ **Flexible:** Use 28 days post breeding and beyond in cattle and goats
- ✓ **Accurate:** 99.3% Sensitive and 95.1% Specific
- ✓ **Cost Effective:** \$3.75/sample
- ✓ **Fast:** Results to your Smartphone next business day
- ✓ **Convenient:** Sampling and shipping supplies, circulating shippers available
- ✓ **Efficient:** Conduct disease analysis on same sample

Effectively implement blood pregnancy testing to improve reproduction in:

- herds with limited or no pregnancy checks
- herds without convenient access to palpation or ultrasound services
- herds relying too much on the cleanup bull
- herds with room for improvement in heifer reproduction

Blood pregnancy testing detects proteins specific to pregnancy produced by the fetus. Pregnancy testing by blood allows for convenient detection 28 days after breeding, and throughout gestation.
