

ACCEL RS

Recovery solution (stress supplement and electrolyte combination) aiding in hydration and digestive health for calves. Contains a source of live (viable) naturally occurring microorganisms

RESEARCH-SUPPORTED FEATURES AND BENEFITS

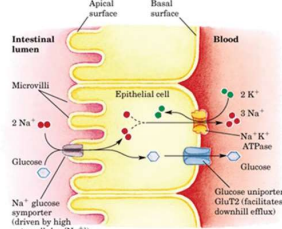

Restore

- Plasma helps facilitate gut repair, reduce peak diarrhea volume, improve intestinal permeability and aid in regeneration of the villous surface
- Plasma is a great source of functional proteins including antibodies, growth factors, hormones, immune cells and anti-microbial compounds

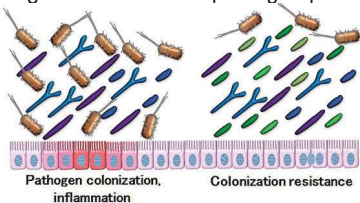

Re-energize

- The calf needs energy to mount an immune response
- Glucose provides the energy the calf needs to get up and facilitates nutrient and electrolyte absorption via sodium channels

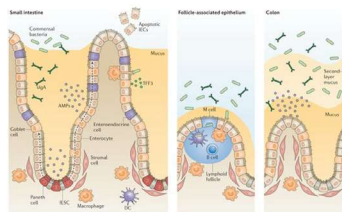

Recolonize

- Includes Tri-Mic WD as a source of live (viable) naturally occurring microorganisms. Tri-Mic WD repopulates the gut with beneficial microflora ("good bacteria") which helps keep the gut pH low
- Low pH makes the gut less tolerant to pathogen proliferation

Rehydrate

- Dehydrated calves have vulnerable mucosa
- Electrolytes are used to correct and prevent metabolic acidosis

AVAILABLE PACKAGE SIZES

4 oz packet (single dose)
Case = 18 - 4 oz packets
25 lb bag

STORAGE

Store in a cool, dry area for maximum stability. Avoid leaving open for extended periods of time.

MANUFACTURED FOR

Select Sires Inc.
Plain City, OH 43064

DIRECTIONS FOR USE

Mixing:

Mix 4 oz (1 packet or 1 scoop) into 2 quarts of warm water until dissolved

Feed 2 quarts of Accel RS 1-3 times daily depending on degree of stress and dehydration severity. Keep feeding until resolution of symptoms. Continue to feed milk replacer or whole milk.
