

# FIRST 21™ Supplement

**A nutritional supplement to be added to pasteurized whole milk or milk replacer and fed to pre-weaned calves. Contains a source of live (viable) naturally occurring microorganisms**

## RESEARCH-SUPPORTED FEATURES AND BENEFITS

Formulated with functional proteins from three sources:

1. Dried bovine colostrum
  2. Spray-dried plasma
  3. Egg proteins
- A combination of these three functional protein sources provides immune support reducing antibiotic use, a reduction in scours, improved digestive system development, increased starter intake, and increased calf growth and development during the critical first weeks of life.

Formulated with 1-gram/head/day dosage source of probiotics, Tri-Mic WD

- Provides beneficial micro-flora for competitive exclusion of pathogens, reduction of scours, and improved feed intake and utilization, and weight gain

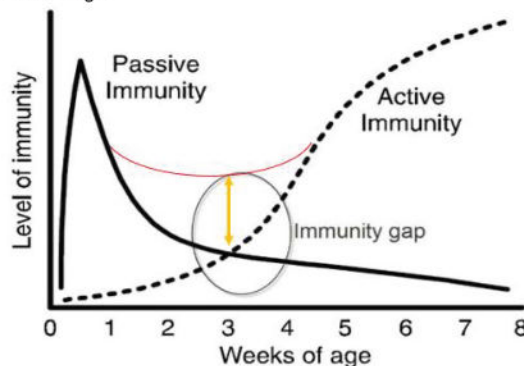

**First 21™ - Same great benefits in two formulations - Supplement or Complete Milk Replacer**

- First 21™ is available as a supplement to be added to pasteurized whole milk or milk replacer.
- First 21™ is available as a complete milk replacer.

## WHEN TO USE

First 21™ is designed specifically to assist in bridging the critical immunity gap that occurs between the time when a calf is relying on antibodies provided from colostrum replacer or maternal colostrum until its own immune system is developed at 1-2 months of age.

## DIRECTIONS FOR USE

Add 1.2 oz. (35 grams) of First 21™ S to calf milk replacer or pasteurized whole milk. For best results, feed at a rate of 1.2 oz. (35 grams) per calf per feeding. Feed continuously, twice a day for 2 to 3 weeks.

## BATCH MIXING

No. OF CALVES FED	No. OF SCOOPS OF FIRST 21™ SUPPLEMENT	No. OF POUNDS OF FIRST 21™ SUPPLEMENT
1	1	1.2 oz. (35 grams)
20	20	1.5
