Genetic trends

Select Sires is highly focused on Herd Health Profit Dollars (HHP\$). We believe bulls that sire daughters who are productive longer, produce more pounds of solids, are more disease-resistant, and are more fertile create a recipe for more-profitable cattle and enterprises. Developing these bulls requires discipline and focus, and ensures you have access as quickly as possible.

Genomics has allowed us to make tremendous advancements in various markets. Polled and Slick are two industry focuses that Select Sires has excelled in with 250H017298 HABULOUS-P, 7H017158 HOLY-P, 250H017075 AKSHAY-P, and 9H016849 ICE CUBE-S available to NxGEN members. These sires rank as high as their traditional peers and have been extensively used as sires of sons.

The NxGEN lineup includes sires to meet the needs of every dairy producer, regardless of management, environment, or selection criteria. New sires are released into the NxGEN program as outstanding-quality sires, often monthly. This allows you access to the latest and greatest even quicker, without waiting until the next proof run.

Convenience and variety

You DON'T HAVE TO WAIT! NxGEN semen is direct shipped to you. When you order through your local CentralStar team member, it arrives within days, not weeks. Additionally, both conventional and sexed semen are available, giving you the flexibility to meet your specific breeding goals.
