

BUILD A BETTER CALF[®] ACCELAIRATE

NUTRITIONAL SUPPLEMENT TO SUPPORT THE RESPIRATORY SYSTEM OF YOUNG CATTLE

Natural essential oils, herb extracts and antioxidants

AVAILABLE PACKAGE SIZES

2 kg (4.4 lb.) bag

- Case = 6 bags
- Pallet = 40 cases (240 bags)
- Bag contains scoop equivalent to ~5 grams

10 kg (22 lb.) bag

- Pallet = 100 bags
- Bag contains scoop equivalent to ~50 grams

STORAGE

- Store in a cool, dry place. Keep tightly closed.

RESEARCH-SUPPORTED FEATURES AND BENEFITS

A unique combination of research-supported ingredients formulated to:

- Preserve respiratory health
- Alleviate symptoms of respiratory disease
- Support the recovery process from respiratory distress
- Maintain animal health

Contains Essential Oils and Herb Extracts

- Antitussive, expectorant and bronchial dilatives help alleviate symptoms of respiratory distress
- Help reduce irritation of the throat, suppress coughing and promote expectoration of bronchial secretions

Bioactive Compounds

- Help to stimulate appetite, drive feed intake and reduce weight loss when animals need nutrients the most

Mannon-Oligosaccharides (MOS), Beta-Glucans and Nucleotides

- MOS help protect the calf against secondary pathogens and are effective in reducing the incidence of scours
- Beta-Glucans stimulate innate immune cells and help fight infections
- Nucleotides promote fast intestinal cell recovery and enhanced nutrient absorption resulting in better animal performance during pathogen challenges

A complete natural solution

- This combination of immune enhancers, antioxidants and anti-inflammatory agents help reduce the incidence of infections, decrease oxidative stress and improve animal performance
- No VFD or prescription required

Highly palatable and allows for multiple application options (liquid diet or dry feed)

- Mixes easily into all application options
- Designed to be mixed into pasteurized whole milk, milk replacer, water or dry calf feed

FEEDING CHART

AccelAIRate Unit Size	Calf Weight (lbs.)	Number of Grams Per Head Per Day	Number of Feedings Per Bag
2 kg - 4.4 lb. Bag	100 - 199	5	400
2 kg - 4.4 lb. Bag	200 - 299	7.5	266.7
2 kg - 4.4 lb. Bag	300 - 650	10	200
2 kg - 4.4 lb. Bag	>650	12.5	160
10 kg - 22 lb. Bag	100 - 199	5	2000
10 kg - 22 lb. Bag	200 - 299	7.5	1333.3
10 kg - 22 lb. Bag	300 - 650	10	1000
10 kg - 22 lb. Bag	>650	12.5	800

DIRECTIONS FOR USE

AccelAIRate is designed to be mixed into pasteurized whole milk, milk replacer, water or dry calf feed.

Calves weighing 100-200 lbs.: Mix and feed at a rate of 5 grams per calf per day for a minimum of 10 consecutive days. Feed AccelAIRate prior to and during times of respiratory distress such as transporting, regrouping or environmental challenges. Enclosed scoop in the 2 kg bag holds 5 grams and the 10 kg bag holds approximately 50 grams of AccelAIRate.

Calves weighing more than 200 lbs., please reference the table for additional feeding rates based on weight.
